

MAKE A MONSTER

HI, I AM CARA
THE CAMELON
ARTS MONSTER!

1.

Use your pens to customise Cara! You could give her a pattern, fangs, fur, horns, hair, extra eyes or whatever else you fancy!

Can you guess what 3D shape I am? Clue: it begins with a 'C'!

2.

Then cut her out, fold along the lines dotted lines.

3.

Assemble into a cuboid by gluing the sides together along the green tabs.

4. Now you have made Cara, you are going to create your own mythical monster on **Sheet B**. How many eyes will it have? We have given you some googly eyes to glue down to get you started! You could also cut and stick paper and other materials left over from last month's activities to create fun textures if you want. Will your monster be a combination of animals that already exist? Does it have claws, wings, tusks, spikes, scales or a tail? What is it's personality like? Scary? Grumpy? Friendly? Cute?

5. After designing your monster it's time to make them real! Use your block of FIMO clay to mould your monster. Once you have finished bake your monster in the oven at 110°C for 30 mins (grab an adult to help for this bit!). This will turn your monster model into a solid toy that won't break! **Make sure to send us a picture of your new friend - we will be giving out prizes for the the scariest and the cutest monsters!**

MAKE A MONSTER

Create an image of your monster in this box - you could draw or cut and glue down different types materials (you can use leftover scraps from the previous pack but could also cut out bits of pictures from old newspapers or magazines).
