

TRASH TAPESTRY: HOW TO WEAVE WITH RUBBISH!!

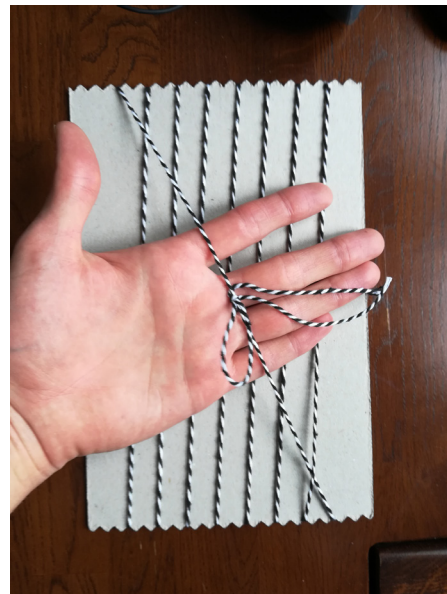

What you will need:

- String
- A weaving card
- Scissors
- Scrap strips of coloured material: **fabric, plastic, paper...**

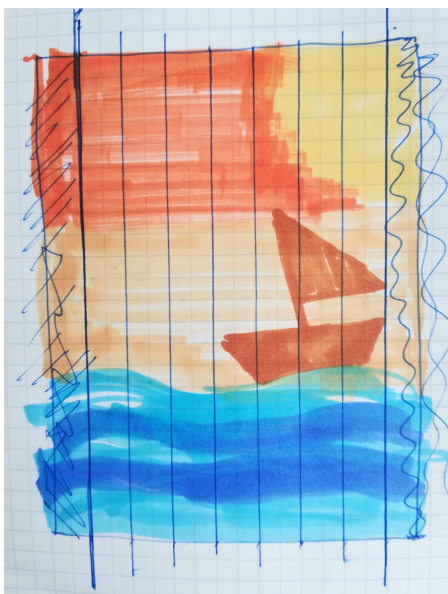

1. Prepare your board. The board has spikes called **teeth**. With the teeth at the top and bottom, you are going to wind the string around the card going between every **second tooth**.

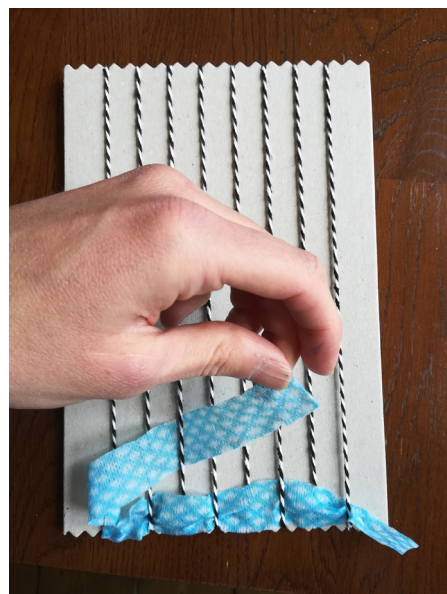

2. Secure string. once you have 8-10 lines. Tie the start and end of string together in a bow at the back. The back side teeth are a bit rougher.

3. Plan your weaving. Draw a picture or pattern you wish to create. Draw the number of lines your board has on top of your drawing.

4. Begin to weave. Start at the bottom of board. Choose a strip of colour, and begin threading the strip **UNDER** then **OVER**. **Don't pull too tight!**

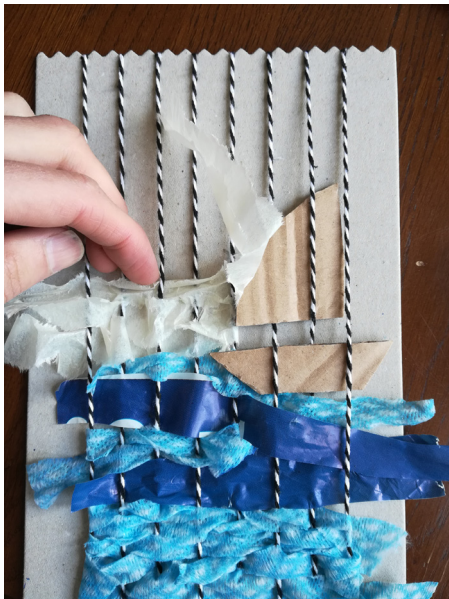

5. Layer up your image. Add the strips of material moving up, changing colour to make the different shapes in your drawing.

6. Create shape and texture. I squeezed the blue strips together to make it more 'wavy' and then cut some shapes in cardboard to make the boat look very solid.

6. Fill up the board!

7.
**DISPLAY YOUR
MASTERPIECE!**
